**Dr.Dodgy's Intergalactic Auto-Mechanical Circus
brings high tech tomfoolery to the Arts at Marks
Garage**

Come see the world's first intergalactic Augmented
Reality circus!

HONOLULU, March 14th AND 15, 2019 -- Machines, manipulations, magic and more! Join Dr.Dodgy as he regales you with tales of his travels through the universe in search of the meaning of life. Inspired by his adventures, Dr.Dodgy and his machinations have crafted an experience to tickle the fancy of adults and children alike. Be prepared when his rocket ship lands by downloading the app and bringing your iPhone, Android, or compatible device to the show. During the performance certain elements will **ONLY** be visible with the app, though the show can be enjoyed without the augmented reality enhancements. So charge you battery, grab a friend, and come see the circus in a whole new way.

Fit for all ages, **Dr.Dodgy's Intergalactic Auto-Mechanical Circus** mixes augmented reality robots, asteroids and more with live juggling, object manipulation and magic. This blend of 21st Century technology and 19th century vaudeville is a first in the Hawaiian islands and took second place overall in the National AT&T Mixed Reality Hackathon with Magic Leap in San Francisco.

- Thursday March 14th 730pm THE ARTS AT MARKS GARAGE - 1159 Nu'uauu Ave
- Friday March 15th 730pm THE ARTS AT MARKS GARAGE - 1159 Nu'uauu Ave
- To download the app and for a full list of compatible devices visit www.DrDodgy.com

Dr.Dodgy's Intergalactic Auto-Mechanical Circus is the brainchild of Andrew Towl, a juggler turned game developer and augmented reality enthusiast. Along with his development partner, Andy Cochrane, Andrew spent the last year constructing the show and was thrilled to receive standing ovations from packed houses at the Oahu Fringe Festival just last month. For more details and to download the app visit www.DrDodgy.com.

“Techutainment at its finest. My brain tingled from all the visual treats and my belly ached from all the laughing. This show does a great job of blending entertainment and technology into one ball of fun”

-Samantha Kimsey (CEO/Founder of Computational Thinkers)

We had the pleasure of having Andrew Towl as a guest on an episode of *Design Talk Hawaii* dedicated to the *Oahu Fringe Festival*. I was fascinated by his project “*Dr. Dodgy’s Intergalactic Auto-Mechanical Circus*” and had the opportunity to attend one of his performances during the festival. What a delight! As a lifelong theatre professional, I must admit to being a little wary of the involvement of mobile devices during a live performance. But in this particular case it was a fascinating enhancement of the interactive performance. Andrew is an inventive and charming performer. And while his juggling skills and stage persona are wonderfully entertaining in their own right, the addition of a 3-Dimensional augmented reality experience literally takes the show to new dimensions! I highly recommend you purchase a ticket, download the app, and pack your bags/phone for a colorful, vibrant, lively adventure worthy of Jules Verne!”

-Miles Phillips (Producer -*Design Talk Hawaii*)

“I think that Dr.Dodgy’s intergalactic show was funny, cool and awesome. I think it was very smart to use iPhones to see everything like asteroids rocket ships and even here cool alien sounds.”

-Kamalu (age 9)

“I don't know how much farther you can take a street juggling act!
Not only are you suspending balls & orbs in the air defying the power of gravity (& doing it superbly!) but NOW you've added hovering mechanisms & space crafts that actually fly at the audience!
Oh it's a BIG SHOW for a Dodgy juggling maniac! See it.”

-Jeff Gere (Author, Storyteller, Puppeteer)

“Wow, Just wow! We went to see Dr.Dodgy’s Intergalactic circus for the opening show. What a great show! Such a great idea to combine circus arts with modern technology. Make sure to download the app or you’ll miss the flying spacecraft flying over you.”

- Ronja Buck (CEO/Founder of Circus Olina)
